Peotone Families,

In August, the District approved working with a new architectural firm, Wight & Co. One of their first steps in understanding the District's facility and educational needs is to complete a Feasibility Study for the Connor Shaw Center, Peotone Elementary School, Peotone Intermediate Center, and Peotone Junior High School. The purpose of the Feasibility Study is to determine the needs of the district and examine possible scenarios to provide the best educational environment possible for the students and staff of Peotone, by examining:

- Facility Conditions
- Space & Programming Needs
- Possible Strategies for Consolidation
- Facility Planning Processes

Since October, members of the District have been working with Wight & Co. to examine all facility needs of Peotone CUSD 207U through building site visits, Opportunity Workshops, and a Steering Committee.

**Opportunity Workshops (November & January)**

Members: Building Leaders/Teachers, District Admin

Purpose: Key School Stakeholders provide input on:

- current educational programs
- facility constraints from the view of the educator
- next gen learning spaces
- lay the groundwork for future planning efforts

**Steering Committee Meetings (December & January)**

Members: Board Members, District Admin, Tech Director, Building Principals, Community/Parents

Purpose: School-Specific Planning Concepts/Scenarios

On Monday, January 26th, Wight & Co. will be holding a Community Engagement Meeting on Facilities to support the development of the Feasibility Study. The meeting will take place in the Peotone High School Commons & Auditorium at 6:00 pm. We encourage your attendance as we review information from our previous workshops and site visits and collect participant feedback on planning scenarios.

*Interested individuals should sign up to attend by clicking on the link below and completing the form:  
[Parent/Community Engagement Meeting on Facilities](#)*

More information is available on our school website at the [Feasibility Study Webpage](#).
